Ok, the installation instructions for Gallery2 make no sense. I have Zen Cart installed and working fine. I am trying to implement Gallery2 but I can't get past a certain point in the installation of Gallery2.

Gallery2 has a ZenCart folder after you extract Gallery2. You are supposed to take the contents of that folder and put it into your ZenCart folder on your web site. Ok fine, I did that. I am able to change the web site template to the ones provided by Gallery2 after this point, sweet. Now here are the problems. Very vague description in the installation instructions at this point...

<http://codex.gallery2.org/Gallery2:Modules:zencart>

Here's where I am stuck...

In Gallery2, you need to make the following changes:

- 1. Upload the module files in the gallery2/ directory to your Gallery2 installation's modules directory.*
- 2. In Gallery2 Site Administration, click on Plugins and find Zen Cart under the Commerce heading. Then click Install.*

Step 1 refers to "your Gallery2 installation's modules directory". What are they talking about?! I don't have a Gallery2 installation directory!!! Nowhere in the instructions does it say to create/install Gallery2 (which would create an install directory)! I can't even

Why Do Websites Fail?

- “ No one who has the time or expertise to provide %fresh+content
- “ Discussion groups. +embarrassed to show ignorance+
- “ Links are no longer operative
- “ The website is used to promote the accomplishments of the organization.
- “ %doneq have the time to regularly check the website.+
